Preface	viii	3.3	How many zoos?	46
Acknowledgements	ix	3.4	Where are the world's zoos?	47
Part 1 History, organisation and regulation	1	3.5	Zoo closures	47
1 The purpose and popularity of zoos	3	3.6	Further reading	47
1.1 Introduction	4	3.7	Exercises	47
1.2 What is a zoo?	4	4 Zoo organisation and management	49	
1.3 The increasing public interest in wildlife	4	4.1	Introduction	50
1.4 Who owns zoos?	10	4.2	The international, regional and national organisation of zoos	50
1.5 What are zoos for?	12	4.3	Keeper organisations	52
1.6 Zoo mission statements – what do zoos say they do?	13	4.4	International Union for the Conservation of Nature and Natural Resources (IUCN)	53
1.7 Biophilia, human well-being and zoos	15	4.5	Wildlife NGOs	56
1.8 Zoo enthusiasts	15	4.6	The organisation and management of a zoo	57
1.9 Further reading and resources	16	4.7	Further reading and resources	64
1.10 Exercises	16	4.8	Exercises	64
2 Conservation	17	5 Zoo legislation	65	
2.1 Introduction	18	5.1	Introduction	66
2.2 Why bother with conservation?	18	5.2	Who licenses zoos?	66
2.3 Biodiversity	19	5.3	Other wildlife and zoo-related legislation	72
2.4 Biodiversity hotspots	20	5.4	Health and safety law	84
2.5 Extinction	20	5.5	Environmental protection	84
2.6 Threats to wildlife	22	5.6	Codes of practice and government policies	84
2.7 Naming animals	23	5.7	Further reading and resources	84
2.8 How are new species discovered?	27	5.8	Exercises	85
2.9 Databases of animal species	29	6 Ethics and zoos	87	
2.10 Further reading	29	6.1	Ethics	88
2.11 Exercises	29	6.2	Animal welfare organisations and anti-zoo groups	95
3 A short history of zoos	31	6.3	Further reading	97
3.1 Introduction	32	6.4	Exercises	98
3.2 A brief history of zoos	32			

Part 2 Enclosures, husbandry and behaviour	99	10.5 Stereotypic behaviour	201
7 Zoo and exhibit design	101	10.6 Environmental enrichment	206
7.1 Introduction	102	10.7 Animal training	216
7.2 Zoo design	102	10.8 Further reading and resources	219
7.3 Enclosure and exhibit design	109	10.9 Exercises	221
7.4 Barrier design	119	11 Animal welfare and veterinary care	223
7.5 Types of exhibits	127	11.1 Introduction	224
7.6 Health and safety	131	11.2 Preventative medicine	224
7.7 Animal enclosure requirements	137	11.3 Infectious diseases	224
7.8 Introducing animals to a new enclosure	146	11.4 Dental problems	230
7.9 Separation of animals at night	146	11.5 Congenital problems	230
7.10 Hygiene	146	11.6 Pest control	230
7.11 Enclosure design and sustainability	147	11.7 Poisoning	231
7.12 Further reading and resources	148	11.8 Measuring welfare	232
7.13 Exercises	149	11.9 Psychological stress	233
8 Nutrition and feeding	151	11.10 Longevity of animals in zoos	235
8.1 Introduction	152	11.11 Old age	236
8.2 The constituents of food	152	11.12 Case study: Diseases in elephants	236
8.3 Energy	157	11.13 Animal handling, capture and transportation	237
8.4 Feeding modes and behaviours	160	11.14 Transportation	238
8.5 Digestive systems	162	11.15 Quarantine	241
8.6 What should zoos feed their animals?	164	11.16 Further reading and resources	244
8.7 How should food and water be presented?	167	11.17 Exercises	244
8.8 Feeding by visitors	169	Part 3 Conservation	245
8.9 Food preparation and storage	169	12 Collection planning and captive breeding	247
8.10 Nutritional problems	170	12.1 Introduction	248
8.11 Sources of dietary information	171	12.2 Collection planning	252
8.12 Further reading and resources	172	12.3 Institutional planning	254
8.13 Exercises	172	12.4 Regional planning	255
9 Reproductive biology	173	12.5 Demography of zoo populations	261
9.1 Introduction	174	12.6 Genetic management	267
9.2 Reproductive behaviour	174	12.7 Promoting reproduction	283
9.3 The physiology of reproduction	176	12.8 Population control	293
9.4 Further reading	185	12.9 Captive breeding of invertebrates	296
9.5 Exercises	185	12.10 Resurrecting lost species	297
10 Zoo animal behaviour, enrichment and training	187	12.11 Further reading and resources	298
10.1 Introduction	188	12.12 Exercises	299
10.2 The development of the study of animal behaviour	188	13 Record keeping	301
10.3 The behaviour of animals in zoos	189	13.1 Introduction	302
10.4 The effect of humans on the behaviour of animals in zoos	199	13.2 Marking and identification	302
		13.3 Record keeping systems	306
		13.4 Measuring animals	308
		13.5 Further reading and resources	310
		13.6 Exercises	311

14 Education, research and zoo visitor behaviour	313	15.6 Releasing captive-bred animals to the wild	349
14.1 Introduction	314	15.7 Is there a legal obligation to reintroduce animals into their former habitats?	354
14.2 Education	314	15.8 Reintroduction and re-wilding	357
14.3 Zoo interpretation and signage	317	15.9 Evaluating the contribution of the zoo and aquarium community to <i>in-situ</i> conservation	357
14.4 The role of education departments	322	15.10 Further reading	358
14.5 Visitor behaviour	326	15.11 Exercises	359
14.6 Research, resources and expertise	333	Appendices	359
14.7 What type of research is done in zoos?	338	Appendix 1 Animal classification	360
14.8 Further reading and resources	342	Appendix 2 Some useful websites	365
14.9 Exercises	342	Acronyms used in the text	375
15 <i>In-situ</i> conservation and reintroductions	343	References	377
15.1 Introduction	344	Index	393
15.2 Raising funds for conservation	344		
15.3 Educational outreach projects	346		
15.4 Provision of <i>ex-situ</i> captive breeding and research facilities	346		
15.5 Zoos, native species conservation and wildlife rescues	348		

COMPANION WEBSITE
