

Contents

Contributors	ix
Preface	xi
Chapter 1 Defining the equine genome: The nuclear genome and the mitochondrial genome Bhanu P. Chowdhary	1
Chapter 2 Genetic linkage maps June Swinburne and Gabriella Lindgren	11
Chapter 3 Physical and comparative maps Terje Raudsepp and Bhanu P. Chowdhary	49
Chapter 4 The Y-chromosome Terje Raudsepp, Nandina Paria, and Bhanu P. Chowdhary	73
Chapter 5 Unexpected structural features of the equine major histocompatibility complex Loren C. Skow and Candice L. Brinkmeyer-Langford	93
Chapter 6 Assembly and analysis of the equine genome sequence Claire M. Wade	103
Chapter 7 Genomic tools and resources: Development and applications of an equine SNP genotyping array Molly McCue and Jim Mickelson	113
Chapter 8 Functional genomics Stephen J. Coleman, Michael J. Mienaltowski, and James N. MacLeod	125
Chapter 9 Coat color genomics Samantha A. Brooks and Rebecca R. Bellone	143

Chapter 10	Genomics of skin disorders	155
	Amy E. Young, Stephen D. White, and Danika L. Bannasvch	
Chapter 11	Genomics of muscle disorders	171
	James R. Mickelson, Stephanie J. Valberg, Carrie J. Finno, and Molly E. McCue	
Chapter 12	Genomics of skeletal disorders	187
	Ottmar Distl	
Chapter 13	Genomics of reproduction and fertility	199
	Terje Raudsepp, Pranab J. Das and Bhanu P. Chowdhary	
Chapter 14	Genetics of equine neurologic disease	217
	Carrie J. Finno and Monica Aleman	
Chapter 15	Molecular genetic testing and karyotyping in the horse	241
	M. C. T. Penedo and Terje Raudsepp	
Chapter 16	Genomics of laminitis	255
	Jim K. Belknap	
Chapter 17	Genomics of performance	265
	Emmeline W. Hill, Lisa M. Katz, and David E. MacHugh	
Chapter 18	Genomics of the circadian clock	285
	Barbara A. Murphy	
Chapter 19	Mitochondrial genome: Clues about the evolution of extant equids and genomic diversity of horse breeds	311
	Cynthia C. Steiner, Kateryna D. Makova, and Oliver A. Ryder	
Index		323

Color plate is located between pages 216 and 217.
