Contributors	vi	13	Home plaque control	175
Reviewers	vii	14	Antibiotics in periodontal disease <i>R. Michael Peak</i>	186
Preface	viii			
Section 1 Understanding the disease process	1		Section 4 Periodontal surgical techniques	191
1 The structure and function of the periodontium <i>Kevin Stepaniuk and James E. Hinrichs</i>	3	15	Gingival surgery	193
2 Etiology and pathogenesis of periodontal disease	18	16	Periodontal flap surgery	206
3 Bacteriology of periodontal disease <i>Colin E. Harvey</i>	35	17	Treatment of the exposed root surface	249
Section 2 The progression of disease	39	18	Osseous surgery and guided tissue regeneration <i>Brook A. Niemiec and Robert Furman</i>	254
4 Gingivitis	41	19	Furcation involvement and treatment <i>Paul Theuns</i>	289
5 Periodontitis	51		Section 5 Related topics	297
6 Local and regional consequences of periodontal disease	69	20	Host modulation therapies	299
7 Systemic manifestations of periodontal disease	81	21	Patient management for periodontal therapy <i>Brett Beckman</i>	305
8 Unusual forms of periodontal disease	91		Section 6 Periodontal instrumentation	313
Section 3 Initial therapy of periodontal disease	105	22	Periodontal hand instruments	315
9 Dental radiology for periodontal disease <i>Jerzy Gawor</i>	107	23	Mechanical scalers	324
10 The complete dental cleaning	129	24	Other power equipment used in periodontology	330
11 Advanced non-surgical therapy	154		Appendices	
12 Local antibiotic usage	170	1	AVDC-Approved abbreviations	334
		2	Dental charts	340
		3	Sharpening	343
		4	Resources	346
		5	Plaque and calculus indices	348
			Index	349
